Art Unit: 1653

The following is an examiner's statement of reasons for allowance:

The following reference appears to be the closest art to the claimed invention. Shan *et al.* (WO 01/03705, January 2001) disclose the use of an LXR agonist to raise plasma level of high density lipoprotein in humans having atherosclerosis-associated diseases by administering an HDL-raising amount of an LXR agonist, however, it does teach a method of treating diabetes or type II diabetes, decreasing hyperglycemia, or decreasing insulin resistance by administering a therapeutically effective amount of an LXR agonist to decrease hyperglycemia or insulin resistance. Therefore, the claimed invention is allowable over the art of record.

A post filing reference (Saez *et al.*, WO 2004/058175) discloses a method of modulating expression of glut4 and other genes involved in glucose metabolism, or a method of treating or ameliorating diabetes or related diseases by administering an effective amount of an LXR agonist to a subject.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.
